

EXTREME WATER TUBING

Three Phoenix DX AC Drives control the water as it races through "The Howlin' Tornado" at the Great Wolf Lodge indoor water park in Wisconsin Dells, WI.

"The Howlin' Tornado" looks like a giant funnel turned on its side. It stands 6-stories high, and measures 65-feet across. Riders climb to the top of a tower where they board four-person tubes and head directly into the eye of the storm. They whirl, swirl, and twist back and forth across the giant funnel dropping 30 feet every second before shooting down a dark tunnel into the plunge pool below.

The three Phoenix DX Drives are rated 75 HP, 25 HP, and 15 HP.

US Drives was chosen because of our excellent price, easy Start-Up, and high reliability.
