RMA POLICY INFORMATION

1. Before any product is returned, it is the responsibility of the customer to contact US Drives, Inc. in order to be issued a Return Material Authorization (RMA) number. Equipment returned with no RMA number will be refused delivery and returned to the sender at their expense.
2. Equipment being returned must be properly boxed and shipped via best way with the freight **prepaid**. It is your responsibility to properly package the product to prevent damage during shipping. In the event of shipping damage, additional repair charges will be included on the invoice. This applies to both warranty and non-warranty returns. Units returned freight collect or C.O.D. will be refused.
3. A purchase order number must be submitted prior to a RMA number being submitted for any non-warranty repair work being completed.
4. Warranty period is determined by serial numbers. Where warranty is questioned, final determination lies with US Drives, Inc. All serial numbers that cannot be identified or cannot be verified will be considered non-warranty items.
5. In terms of the Warranty, US Drives, Inc. will, at its option, repair or replace products that are defective in material or workmanship. As such, only parts and labor are covered by US Drives, Inc.
6. Warranty equipment will be repaired or exchanged (under certain guidelines) under warranty, unless it is determined that the reason for repairs is the result of a customer action. In this case, the repairs will be suspended until the repair price is approved.
7. All billable repairs will be warranted by US Drives, Inc. for **one year** from the date of the repair.
8. The customer will be charged an evaluation fee (per the chart below) for units returned and found free from problems (including warranty items).
9. Units returned for repair will be repaired in order of date received. Emergency Breakdown (EB) service is available. With this option you can expect a 24 to 48 hour turnaround (not including date of receipt, Saturday, Sunday or Holidays). This **Emergency Breakdown service is available for an additional 20% of the quoted repair price (minimum charge is \$500)**. This fee is required regardless of warranty status.
10. Standard repair is quoted. If during the actual repair of the equipment additional damage is found the customer will be contacted by telephone, fax, e-mail, or a combination of these. Customer approval must be received prior to ANY work being performed.
11. If the customer decides not to go ahead with a repair after being given either the initial or a revised estimate, they will be responsible for the evaluation fee assigned to that particular unit.
12. Repaired units will be shipped freight Best Way. If next day or air shipment is requested, freight will be either collect or billed to the customers account number, regardless of warranty status.
13. Repair rates are subject to change without notice.
14. All equipment returned for evaluation and/or repair will be subject to an evaluation fee.
15. The assigned RMA number will be held for a period of 30 days. If the equipment has not been received by the end of this period, a new number must be requested.
16. A RMA number will be issued by fax or e-mail once this completed form is received.
17. Once an estimate is provided the customer has 30 days to approve repair work or arrange for the defective unit to be returned to them or scrapped. Customer will be invoiced for the evaluation fees.
18. All warranty repairs will be warranted for **one year** from the date of the repair. All warranty repairs will carry the standard product warranty.
19. The evaluation fee is waived if the repair is made or a new replacement is purchased within 30 days of the repair quote.

Evaluation Fees (includes full diagnosis)

Description	Fee ¹⁹
PC Boards	\$200 each
Drives / Regens	\$350 each up to 60 HP \$500 each from 75 HP – 200 HP \$600 each from 250 HP and larger
